

Weinberg Holdings Limited

Shaping Packaging, Elevating Brands.

Who We Are

End-to-end packaging development, from concept through production and delivery

Profile

Company

Weinberg Holdings Limited

Established

2009

HQ

Headquartered in Taiwan, with an Asia-wide production network

Quality & Sustainability

ISO 9001:2015-certified partner factories

FSC-certified paper sourcing available

Strengths

- Flexible manufacturing structure
- Quality aligned with global standards
- Integrated production and logistics coordination

Service Overview

Packaging Development

Integrated packaging and structural design that improves protection, packing, and transport efficiency

Printing & Finishing

High-definition printing and specialty finishes that ensure consistent color and a refined finish

Supply Chain Management

End-to-end quality control, load optimization, and logistics coordination that enable smooth global delivery

Supply Challenges & Weinberg's Approach

A structured approach to complex packaging supply, improving control over quality, cost, and delivery timelines

Complex Supply Structure

Weinberg's Approach

Approach for Stable Supply

Supply Base Built to Global Standards

Combining a strong production base with rigorous quality control to meet industry-specific considerations

Production Network

Partner Factory Track Record*

Apparel & Fashion

Dior

Chloé

Brand Expression
Seasonal Rollouts

Beauty & Cosmetics

LANCÔME
PARIS

ORTIGIA
SICILIA

Special finishes
Premium look and feel

Footwear

HOKA

SKU variation
Packing efficiency

Consumer Electronics

acer

JBL

Insert design
Protection and precise fit

Weinberg's Supply Base

Asia-wide production network

Cross-industry packaging expertise

*Examples shown are based on partner factory experience and do not represent direct transaction records with Weinberg.

Elevating Quality Through End-to-End Support

Connecting development, printing, and logistics to achieve stable quality and smooth delivery

01

Packaging Development

Designing for function & scale

Integrated packaging and structural design that improves protection, packing, and transport efficiency

Packaging Development: Designing for Function & Scale

Integrated packaging and structural design that improves protection, packing, and transport efficiency

Production Capabilities in Action

Secure Fit

A minimal, precision-engineered structure keeps contents firmly in place

Strength & Consistency

Simple construction minimizes variation and ensures consistent quality

Interior Layout

Tailored compartments balance presentation, accessibility, and protection

Scalable Design

Standardized construction supports efficient assembly and consistent production

Selected production examples from Weinberg's partner factories.

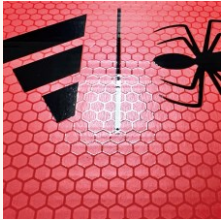

Printing & Finishing: Refining Color & Texture

High-definition printing and specialty finishes that ensure consistent color and a refined finish

Flexible Specialty Finishing Options

Enhance the final look and feel through coatings and specialty finishes

Spot UV

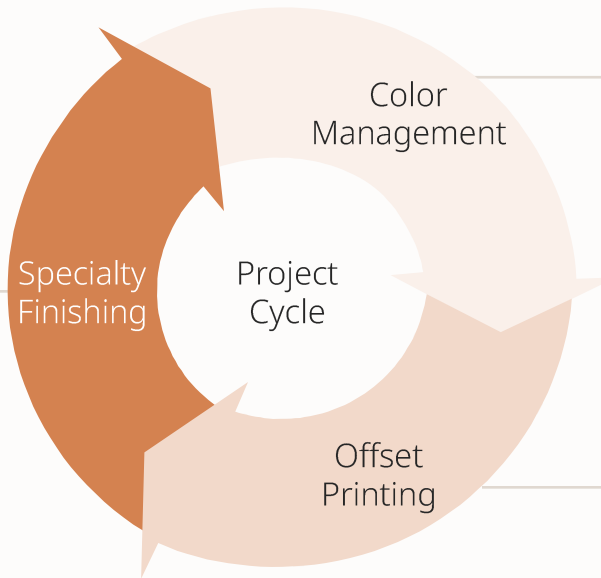

Embossing

Foil Stamping

Window

Calibration & Proofing Standards

Consistent brand colors across every batch, material, and printing method

High-Fidelity Print Execution

Precision multi-color printing and in-line coating deliver sharp detail, vibrant tones

KOMORI LITHRONE GX40 Advance
Six-color offset press with in-line coating

Supply Chain: Supporting Stable Delivery

End-to-end quality control, load optimization, and logistics coordination that enable smooth global delivery

Quality Control

- **Multi-stage QC checkpoints** throughout production and fulfillment*
- Minimizes rework and delay risks to **keep delivery on schedule**

Pallet & Load Optimization

- **Customized packing plans** based on box strength, carton count, and destination
- **Reduces shipping costs and storage space** while helping lower the carbon footprint

Logistics

- **Coordination** with freight partners, co-packers, and distributors
- Handles retailer labeling, shipment readiness checks, and **coordinated regional launches**

Factory

Warehouse

* See the "Production Flow Chart" in the appendix for more information

Production Capabilities & Lead Times

Optimizing the production setup to match each project's specifications, volume, and timeline

Product Type		Scale	Lead Time
Packaging	Die-Cut Box	Small-batch production available	14 days, 7 days for rush orders, regardless of quantity
	Rigid Box		20-25 days, 15 days for rush orders, depending on quantity
	Sleeve		Lead times are optimized for each project according to finalized specifications
	Inserts		
Printed Components	Insert Card		
	CD Cover		
	Booklet		
	Sticker		
	Label		
Auxiliary Materials	Bags		
	Protective Materials		
	Desiccant Packet		

Strategic Value Across Every Stage

From concept to delivery, Weinberg brings together quality, flexibility, and coordination for reliable production

Quality Foundation

01

Asia-Wide Production Network
Provides a broad production base that support **cost competitiveness and predictable delivery**

02

Cross-Category Packaging Experience
Applies experience across categories to **balance structural quality with practical usability**

Scalable Flexibility

03

Small-Batch Production Support
Supports smaller runs and special editions with **flexible production**

04

Packaging Beyond the Box
Offers a full packaging ecosystem, **removing the need to manage multiple suppliers**

Seamless Coordination

05

End-to-End Support
Streamlines workflow to **reduce risk, save time, and ensure consistency**

06

Cross-Border Market Experience
Communicates smoothly across regions with teams working in English, Japanese, and Chinese

Take Your Packaging Further

Whether launching a new product or improving an existing one, Weinberg delivers solutions tailored to your needs
